React.js Developer

Codemaya

01/2022 – 12/2022

Lucknow

My Role in the Company

- Worked as a software developer (React JS developer)..
- Built and managed frontend projects, occasionally overseeing backend tasks as well.
- Led and managed projects, collaborated with team members, and facilitated their progress.
- Wrote and developed new, thoroughly tested code for various software projects.
-

Projects in which I worked

Fullbridge

- Led mobile app project (frontend and backend) from scratch.
- Managed project deployment, addressing team members' issues.
- Develop and manage React components, including the Redux store.
- Ensure authentication for all routes, integrated APIs for CRUD and Auth operations.
- Create and manage an Admin panel for user control, as well as user panel screens.
- Integrate Google Analytics for real-time data. Develop Google Analytics, forget password, and reset password email APIs in the backend using Node and TypeScript.
- Implement a client dashboard, CRUD UI screens, and corresponding APIs and logics, displaying real-time Google Analytics data.

Quaychain

- Lead both the frontend and backend aspects of the project.
- Develop and manage React components alongside the Redux store.
- Convert Excel data to CSV and CSV data to JSON.
- Handle all logical aspects of the project.
- Implement a search logic using three comma-separated values, displaying results on the next page in three different tables.
- Provide full details of all rows on subsequent screens.
- Allow users to add emails, select either three values or a single value, and send those details to the chosen email(s), supporting multiple or single users.
- Collect details of the selected values and generate a PDF with those details.

Obanj

- Implement routes and authentication in the project.
- Develop and manage React components along with the Redux store.

- Integrate APIs for CRUD operations and authentication.
- Implement and manage an admin panel for controlling all products.
- Integrate search logic on the frontend side.

Ediligence

- Develop and manage React components alongside the Redux store.
- Worked on D3 charts.
- Implemented a responsive D3 pointer as required by the client.
- Worked on a responsive popup model. Also, worked on a D3 full donut chart.

Luxehunt

- Worked on carditems UI.
- Improved UI and added copyable labels.
